

## **Bivalve Hatchery Technician**

Bay Shellfish Co. is seeking a person to join our company located near St. Petersburg, Florida. We are an independent hatchery supplying various bivalves for research, restoration & commercial production over the last 19 years. Please refer to [bayshellfish.com](http://bayshellfish.com) for more information on our mission and focus.

### **Duties:**

Management of our SeaCaps continuous microalgae system including master cultures, bivalve culture from broodstock to spat and work with ongoing research collaborations. The work environment is a farm like atmosphere with a wide range of temperatures and tasks which may go from microscopy inspection to tank cleaning.

### **Qualifications:**

Strong attention-to-detail and good organizational skills are paramount. B.S. degree in aquaculture, biology or related field (microbiology, biochemistry, fisheries science). Experience in the shellfish aquaculture industry is preferred.

### **Submission:**

Send resumes to [curt@bayshellfish.com](mailto:curt@bayshellfish.com), must be available immediately, U.S. residents or existing visa holders only, U.S. drivers license required.
